

Long-Term Care (LTC) Services Tender for the Beneficiaries of the Center of National Health Insurance and Other Government Health Sectors

No. NPT0042-26

Tender Items List

2026

I. Overview

This tender comprises 67 items: 56 inpatient daily-care items (Items 1–56) covering four care levels (BNV, CNV, BV, CV) each replicated across the Kingdom's 14 regions, and 11 add-on services (Items 57–67).

Level	Code	Description	Items
Level 1	BNV	Basic Non-Vented	1–14
Level 2	CNV	Complex Non-Vented (advanced wounds)	15–28
Level 3	BV	Basic Vented (IMV)	29–42
Level 4	CV	Complex Vented (IMV + wounds)	43–56
Add-ons	—	Assessment, isolation, procedures, transport	57–67

II. Abbreviations

Regions Reference

Vol.	Volume
Yr	Year

Clinical, Laboratory & Diagnostic Terms

Abbrev.	Full Term
ABG/VBG	Arterial / Venous Blood Gas
ADL	Activities of Daily Living
CBC	Complete Blood Count
CVAD	Central Venous Access Device
CVC	Central Venous Catheter
ECG	Electrocardiogram
IMV	Invasive Mechanical Ventilation
LFT	Liver Function Tests
MDRO	Multidrug-Resistant Organism
NG/OG	Nasogastric / Orogastric (tube)
NPWT	Negative Pressure Wound Therapy
PCR	Polymerase Chain Reaction
PEG	Percutaneous Endoscopic Gastrostomy
PICC	Peripherally Inserted Central Catheter
PT/OT	Physiotherapy / Occupational Therapy
RT	Respiratory Therapy
TPN	Total Parenteral Nutrition
U&E	Urea & Electrolytes

III. Section A – Detailed Item Descriptions & Scope of Service

SN	Item Long Description
item 01 - 14	BNV: Basic Non-Vented Long-Term Care Unit of measure: Per Patient-Day Level 1 — Basic long-term care without advanced respiratory support and without complex wounds Comprehensive long-term care daily package for a medically stable patient who does not require invasive mechanical ventilation or advanced respiratory support and who has no complex or advanced wounds. All components are delivered at the level and frequency clinically indicated by the individual care plan; where a component is not clinically required for a given patient, it is not provided, and no component is separately reimbursable. Included: accommodation and infrastructure (bed and fittings, standard/electric bed where needed, pressure-relief mattress, bedding and laundry, utilities, nurse call system, routine cleaning and disinfection per infection-control requirements); 24/7 nursing care (vital signs, clinical assessment and handover, ADL and personal hygiene, feeding support, medication administration, intake/output, IV and central/peripheral line care, urinary catheter and bowel care, NG/OG and enteral feeding management, tracheostomy care and suctioning, stoma care, Oral care and swallowing assessment, blood glucose monitoring, specimen collection, fall-risk and pressure-injury prevention, restraint management per policy, palliative and end-of-life care, patient/family education); physician and medical care (admission history and examination, care-plan development, medication reconciliation, daily/periodic rounds and clinical review, urgent response, minor bedside procedures, internal specialist referral coordination); basic and standard respiratory therapy (assessment, oxygen therapy, nebulization, chest physiotherapy, secretion management, and routine tracheostomy/airway stoma care and maintenance where applicable); maintenance/supportive medical rehabilitation (PT/OT assessment, range-of-motion, positioning and mobility maintenance, pressure-injury prevention, caregiver instruction, at no fewer than three to four sessions per week per patient per clinical assessment, including appropriate rehabilitation aids); nutrition (dietitian assessment, therapeutic diet, three meals with snacks, hydration plan, enteral tube-feed administration, plus appropriate meals and education for accompanying family); basic wound care (skin inspection, pressure-injury prevention, simple dressings, moisture control, turning schedule, documentation); medication administration and all approved-formulary medications (including therapeutically equivalent alternatives within the same class); device and tube care; infection prevention and control (screening, hand hygiene, isolation compliance, device-associated infection prevention, MDRO precautions, antimicrobial stewardship support); discharge and transfer planning; routine consumables; social and psychological services; facility services (housekeeping, laundry, linen); and all required documentation and periodic reporting. Blood-product administration and all associated clinical work are included (product itself excluded). Parenteral-feeding administration is included (TPN product itself excluded). Laboratory and bedside diagnostics (included as clinically indicated / as needed, no separate reimbursement): complete blood count (CBC); renal panel; electrolytes (U&E); blood glucose; coagulation profile; liver function tests (LFT); urine analysis; microbiological cultures (urine, stool, blood, sputum) and viral screening; COVID-19 PCR; therapeutic drug monitoring; vitamin D; lipid profile. Bedside diagnostics include ECG and glucose testing. Excluded (priced add-on or excluded item, with prior approval): invasive mechanical ventilation and intensive respiratory care; bedside and diagnostic ultrasound; complex/advanced wound care; blood products and derivatives, TPN product, chemotherapy, hemodialysis and similar specialized services; advanced imaging and image-guided procedures; medications outside the approved formulary and high-cost/biologic/specialized excluded-list drugs; negative pressure isolation room; and add-on procedures (PEG insertion/exchange, tracheostomy insertion/exchange, central venous catheter insertion).
item 15 - 28	CNV: Complex Non-Vented Long-Term Care Unit of measure: Per Patient-Day Level 2 — Long-term care with advanced/complex wounds, without advanced respiratory support Comprehensive long-term care daily package for a medically stable patient who does not require invasive mechanical ventilation, but who has advanced, complex, or multiple wounds requiring specialized wound care. All components are delivered at the level and frequency clinically indicated; no component is separately reimbursable. Included: all components of the Basic Non-Vented (BNV) package — accommodation and infrastructure, 24/7 nursing care (at enhanced workload), physician and medical care, basic and standard respiratory therapy, maintenance rehabilitation, nutrition, medication administration and approved-formulary medications, device and tube care, infection prevention and control (enhanced for

SN	Item Long Description
	infected/complex wounds), discharge planning, routine consumables, social and psychological services, facility services, and documentation; blood-product administration (product excluded) and parenteral-feeding administration (TPN product excluded). In addition, this level includes complex/advanced wound care in-bundle: assessment and management of Stage 3 and above pressure injuries and other advanced, chronic, infected, deep, high-exudate, tunneling, undermining, or non-healing wounds, advanced dressings, negative pressure wound therapy (NPWT), repeated reassessment, infection monitoring, wound measurement and documentation, and non-surgical (mechanical/autolytic/chemical) bedside debridement when clinically indicated. Bedside/clinical ultrasound is included in-bundle for this level. Laboratory and bedside diagnostics (included as clinically indicated / as needed, no separate reimbursement): the full BNV lab set (CBC, renal panel, electrolytes, blood glucose, coagulation profile, LFT, urine analysis, microbiological cultures, viral screening, COVID-19 PCR, therapeutic drug monitoring, vitamin D, lipid profile), with added emphasis on nutritional markers (albumin, prealbumin), wound swab culture and sensitivity, and MDRO screening (relevant to complex-wound healing and infection monitoring). Bedside diagnostics include ECG, glucose testing, and bedside ultrasound. Excluded (priced add-on or excluded item, with prior approval): invasive mechanical ventilation and intensive respiratory care; specialized diagnostic ultrasound; blood products and derivatives, TPN product, chemotherapy, hemodialysis and similar specialized services; advanced imaging and image-guided procedures; medications outside the approved formulary and high-cost/biologic/specialized excluded-list drugs; negative pressure isolation room; and add-on procedures (PEG insertion/exchange, tracheostomy insertion/exchange, central venous catheter insertion).
item 29 - 42	BV: Basic Vented (IMV) Long-Term Care Unit of measure: Per Patient-Day Level 3 — Long-term care with respiratory support / invasive mechanical ventilation, without complex wounds Comprehensive long-term care daily package for a medically stable patient who depends on invasive mechanical ventilation (IMV) or requires continuous respiratory support, and who has no complex or advanced wounds. All components are delivered at the level and frequency clinically indicated; no component is separately reimbursable. Included: all components of the Basic Non-Vented (BNV) package — accommodation and infrastructure (ventilator-compatible setup), 24/7 nursing care with airway/tracheostomy suctioning, physician and medical care (including RT care plan), maintenance rehabilitation (with chest PT as needed), nutrition, basic wound care, medication administration and approved-formulary medications, device and tube care, infection prevention and control, discharge planning, routine consumables, social and psychological services, facility services, and documentation; blood-product administration (product excluded) and parenteral-feeding administration (TPN product excluded). In addition, this level includes intensive respiratory care in-bundle: invasive mechanical ventilation and its circuits and humidifiers, intensive respiratory therapy, ventilator weaning protocols, cuff-pressure monitoring, and routine arterial/venous blood gas (ABG/VBG) sampling and chest X-ray related to the respiratory condition. Laboratory and bedside diagnostics (included as clinically indicated / as needed, no separate reimbursement): the full BNV lab set (CBC, renal panel, electrolytes, blood glucose, coagulation profile, LFT, urine analysis, microbiological cultures, viral screening, COVID-19 PCR, therapeutic drug monitoring, vitamin D, lipid profile), with ABG as a routine part of respiratory management and cardiac markers when clinically indicated. Bedside diagnostics include ECG and glucose testing. Excluded (priced add-on or excluded item, with prior approval): complex/advanced wound care; bedside and diagnostic ultrasound; blood products and derivatives, TPN product, chemotherapy, hemodialysis and similar specialized services; advanced imaging and image-guided procedures; medications outside the approved formulary and high-cost/biologic/specialized excluded-list drugs; negative pressure isolation room; and add-on procedures (PEG insertion/exchange, tracheostomy insertion/exchange, central venous catheter insertion).
item 43 - 56	CV: Complex Vented (IMV) Long-Term Care Unit of measure: Per Patient-Day Level 4 — High-complexity long-term care with respiratory support and advanced/complex wounds Comprehensive long-term care daily package for the highest-acuity patient, who depends on invasive mechanical ventilation (IMV) or requires continuous respiratory support and who also has advanced, complex, or multiple wounds requiring specialized wound care. All components are delivered at the level and frequency clinically indicated; no component is separately reimbursable. Included: all components of the Basic Non-Vented (BNV) package — accommodation and infrastructure (ventilator-compatible setup), 24/7 high-intensity nursing care with airway/tracheostomy suctioning, physician and medical care, maintenance rehabilitation (with chest PT/positioning), nutrition, medication administration and approved-formulary medications, device and tube care, infection

SN	Item Long Description
	prevention and control (enhanced), discharge planning, routine consumables, social and psychological services, facility services, and documentation; blood-product administration (product excluded) and parenteral-feeding administration (TPN product excluded). In addition, this level includes both intensive respiratory care (invasive mechanical ventilation and its circuits and humidifiers, intensive respiratory therapy, weaning protocols, cuff-pressure monitoring, routine ABG/VBG and chest X-ray related to the respiratory condition) and complex/advanced wound care (Stage 3 and above pressure injuries and other advanced, chronic, infected, deep, high-exudate, tunneling, undermining, or non-healing wounds, advanced dressings, NPWT, repeated reassessment, infection monitoring, wound measurement and documentation, and non-surgical bedside debridement when clinically indicated). Bedside/clinical ultrasound is included in-bundle for this level. Laboratory and bedside diagnostics (included as clinically indicated / as needed, no separate reimbursement): the full BNV lab set (CBC, renal panel, electrolytes, blood glucose, coagulation profile, LFT, urine analysis, microbiological cultures, viral screening, COVID-19 PCR, therapeutic drug monitoring, vitamin D, lipid profile), with ABG as a routine part of respiratory management, nutritional markers (albumin, prealbumin), wound swab culture and sensitivity, MDRO screening, and cardiac markers when clinically indicated. Bedside diagnostics include ECG, glucose testing, and bedside ultrasound. Excluded (priced add-on or excluded item, with prior approval): specialized diagnostic ultrasound; blood products and derivatives, TPN product, chemotherapy, hemodialysis and similar specialized services; advanced imaging and image-guided procedures; medications outside the approved formulary and high-cost/biologic/specialized excluded-list drugs; negative pressure isolation room; and add-on procedures (PEG insertion/exchange, tracheostomy insertion/exchange, central venous catheter insertion).
57	Admission & Comprehensive Assessment Package Unit of measure: Per Day (maximum three days per admission event) Comprehensive admission and assessment package for referred cases with incomplete reports or documentation, or cases requiring further evaluation to confirm eligibility and determine the appropriate level of care. The package includes, at a minimum: temporary admission and care to ensure patient safety and stability; comprehensive medical and nursing assessment, with respiratory, nutritional, rehabilitation, swallowing, and wound assessment as clinically indicated; bed eligibility review; individualized care-plan development; simple wound dressing; baseline laboratory investigations (renal function, CBC, U&E, coagulation profile); $\pm$ chest X-ray; medications required during the admission process; nursing care; and all resources and urgent clinical procedures required to complete the admission and comprehensive assessment. Reimbursed per day for a maximum of three (3) days per admission event, used once per admission on activation by the beneficiary entity. The Admission & Comprehensive Assessment Package shall not be paid in combination with any main inpatient daily care package (BNV, CNV, BV, or CV) for the same period. Where eligibility is confirmed, the approved daily package value replaces the admission-and-assessment value from the arrival date and time.
58	Negative Pressure Isolation Room Add-on Unit of measure: Per Day Add-on applicable only when a patient is accommodated in a negative pressure isolation room, covering use of the room only, including negative-pressure operation, pressure monitoring, the PPE process, terminal cleaning, and infection-control documentation. Single-room use, contact isolation, and standard infection-control precautions, and HEPA filtration, are not covered by this item and remain within the daily bundle at no additional charge. Reimbursed per day of documented clinical need, subject to prior approval. This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.
59	Inpatient Hemodialysis Unit of measure: Per Session Add-on covering one complete inpatient hemodialysis session, priced as a complete package including all professional services, standard consumables, medications, dialysis equipment use, immediate monitoring, procedure-related documentation, and routine materials required to complete the approved service. Reimbursed per completed session, subject to prior approval This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.

SN	Item Long Description
60	Ultrasound (US) Unit of measure: Per Procedure Add-on covering one ultrasound study as a complete package, including the professional service, equipment use, consumables, and reporting/documentation. This item applies to the Basic Non-Vented (BNV) and Basic Vented (BV) packages only, as bedside/clinical ultrasound is bundled and not separately claimable for the Complex Non-Vented (CNV) and Complex Vented (CV) packages; specialized diagnostic ultrasound remains an add-on in all cases. Reimbursed per study, subject to prior approval This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.
61	Central Venous Access Device Insertion / Replacement Unit of measure: Per Procedure (including PICC lines and dialysis lines - Exclude CVC) Add-on covering insertion or replacement of a central venous access device as a complete procedure package, including the professional service of a qualified physician/practitioner, documented infection-control protocol, procedure environment, standard consumables and the catheter kit, immediate monitoring, and procedure-related documentation. Routine ongoing central-line care is part of the daily nursing bundle and is not claimable under this item. Reimbursed per procedure, subject to prior approval This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.
62	Tracheostomy Insertion Unit of measure: Per Procedure Add-on covering tracheostomy insertion as a complete procedure package, including the qualified physician professional service, a safe procedure environment, medications, respiratory-team and stoma-care-team involvement, standard consumables and the tracheostomy tube, immediate monitoring, and documentation. Routine daily tracheostomy and airway stoma care is part of the daily bundle for all patients and is not claimable under this item. Reimbursed per procedure, subject to prior approval This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.
63	Tracheostomy Exchange / Re-insertion Unit of measure: Per Procedure Add-on covering tracheostomy tube exchange or re-insertion as a complete procedure package, including the professional service, procedure environment, replacement tube, medications, consumables, respiratory and stoma-care involvement, immediate monitoring, and documentation. Reimbursed per procedure, subject to prior approval, This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.
64	PEG Tube (Percutaneous Endoscopic Gastrostomy) Insertion Unit of measure: Per Procedure Add-on covering PEG tube insertion as a complete procedure package, including the physician/endoscopy professional service, procedure environment, medications, standard consumables and the PEG device kit, immediate peri-procedure monitoring, stoma-care team involvement, and procedure-related documentation. Management of complications requiring escalation outside scope is

SN	Item Long Description
	excluded. Reimbursed per procedure, subject to prior approval. This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.
65	PEG Tube Replacement / Exchange Unit of measure: Per Procedure Add-on covering PEG tube replacement or exchange as a complete procedure package, including the professional service, procedure environment, replacement device, medications, consumables, immediate monitoring, stoma-care involvement, and documentation. Reimbursed per procedure, subject to prior approval. This add-on is charged in addition to the applicable daily care package (BNV, CNV, BV, or CV) for the same patient and period; it does not replace the daily bundle. The daily package remains payable in full, and this item is reimbursed separately as an approved add-on.
66	Transportation within 100 km Unit of measure: Per Trip Paid transportation borne by the beneficiary entity, activated once per approved transport event, in the two cases defined in the tender only: transfer between the beneficiary entity's hospital and the provider's hospital (either direction), and transfer to another provider for a reason not attributable to the provider. Covers a distance of one hundred (100) kilometers measured one-way from the provider's location to the destination, including the equipped vehicle/ambulance, driver, clinically appropriate medical escort, and equipment and consumables required for safe transport. Distance is measured one-way only via Google Maps shortest route (binding); return distance and indirect routes are not counted. Transport forming part of the patient's treatment need, transfers to appointments/clinics, transfers between the provider's own facilities, transport arising from a provider penalty or shortcoming, and transport of the patient home on discharge are all included in the daily bundle and not claimable here. Requires prior approval and supporting documentation
67	Transportation above 100 km Unit of measure: Per Kilometer Applies to the same approved paid-transport cases as Item 66 (Transportation Within 100 KM). For approved transportation distances exceeding one hundred (100) kilometers, Item 66 shall be billed for the first 100 km, and this item shall be billed for each additional kilometer beyond 100 km. The distance shall be measured one-way based on the shortest route calculated through Google Maps. Return distance, indirect routes, or additional kilometers not included in the approved route shall not be reimbursed. This item requires prior approval and the same supporting documentation applicable to Item 66.
